TRANSPORT

CLIMATE POLICY

Shakti Sustainable Energy Foundation was established in 2009 to facilitate India's transition to a sustainable energy future by promoting policies that encourage energy efficiency as well as the increased generation of renewable energy. The energy choices that India makes in the coming years will be of profound importance. Meaningful policy action on India's energy challenges will strengthen national security, stimulate economic and social development and keep our environment clean.

■ [Appraisal Checklist for Urban Transport Projects](#)

TRANSPORT

Shakti supported Institute of Urban Transport to develop an evaluation criteria to appraise transport projects applying for Central Government's funding assistance based on the principles of sustainable urban transport.

■ Implementation of the NAPCC: Progress and evaluation

CLIMATE POLICY

The National Action Plan for Climate Change (NAPCC) lays the pathway for a directional shift in India's response to climate change. This study assess the level of progress achieved in the implementation of the NAPCC missions and whether they are on track to achieve their stated objectives.

■ Access to Clean Cooking Energy and Electricity – Survey of States

POWER

A Shakti supported initiative for developing energy access indicators for six energy-deprived states of the country. It seeks to inform policy makers about the existing energy delivery mechanisms and to support the government in designing more informed energy policies.
